

**IN THE SPECIFICATION:**

The following clean copy of the paragraph intended to be amended is provided as requested in the Office Action:

Please replace the paragraph beginning on page 7, line 31, through page 8, line 16, with the following:

---

3' The plug housing 12 further defines a pair of spaced apart interior channels 22 extending therethrough between the opposite front and rear ends 12A, 12B of the plug housing 12. The channels 22 are substantially identical to and mirror images of one another. Each channel 22 has a front opening 22A at the front end 12A of the plug housing 12, a rear opening 22B at the rear end 12B of the plug housing 12, and a main channel portion 22C extending therebetween which is greater in cross-sectional size than each of the front and rear openings 22A, 22B. The front and rear openings 22A, 22B of each channel 22 also are offset with respect to one another relative to a longitudinal centerline LL of the plug housing 12, shown in FIG. 7. The front opening 22A has a generally T-shaped configuration and leads not only into the main channel portion 22C but also into opposing top and bottom recessed grooves formed in the interior wall surface 18E of the main body 18 of the plug housing 12. The opposing recessed grooves are substantially identical to one another and are continuous with and extend from the front opening 22A toward but terminate at ends spaced from the rear opening 22B, as seen in FIG. 7.
